# WHY iDELIVERY??

E-commerce is the activity of selling and buying products online, and it has become an important tool for small and large businesses worldwide .

With **iDELIVERY**, your business is interactively managed, data and inventory are fully controlled and daily transactions are easily handled, ensuring efficiency and customer satisfaction .

## NO GEOGRAPHICAL LIMITATIONS

A physical store is located in a particular place and in most cases the people who live nearby come and visit it. So, one of the benefits of an e-commerce store is that it is not bound by geographical boundaries.

A customer can access the portal from anywhere in the world with the help of an internet connection and a device to operate it. The platform is available 24/7 to all its customers in any part of the world and offers information where it is able to send the products and within how many days.

## FLEXIBILITY & SPEED

An individual or a company can easily open an online store within few days whereas a physical outlet needs space, commercial leasing procedure as well as ample construction and decoration time for its opening .

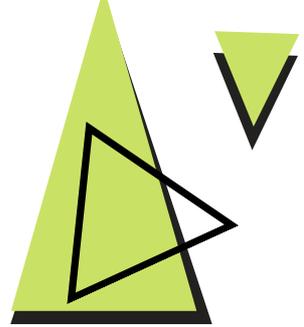

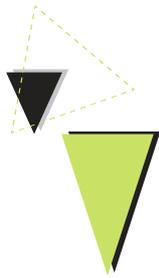

It is possible to change displays and product offerings within minutes in an e-commerce site whereas you need proper planning and ample time and manpower to do so in physical stores . Which makes it easier to scale up the business .
